

# Profiling and Reuse with DITA 1.2

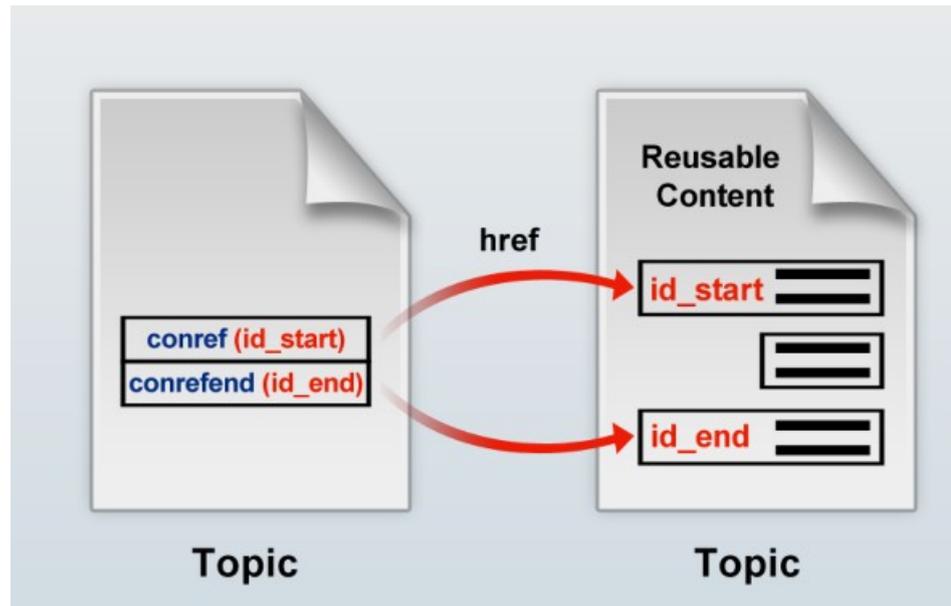

Alex Jitianu

[alex\\_jitianu@oxygenxml.com](mailto:alex_jitianu@oxygenxml.com)

# Summary

- Content references
- Profiling/conditional content
- Conditional publishing
- Subject scheme
- Working with keys
- Customizing a transformation scenario
- Using a different DITA-OT

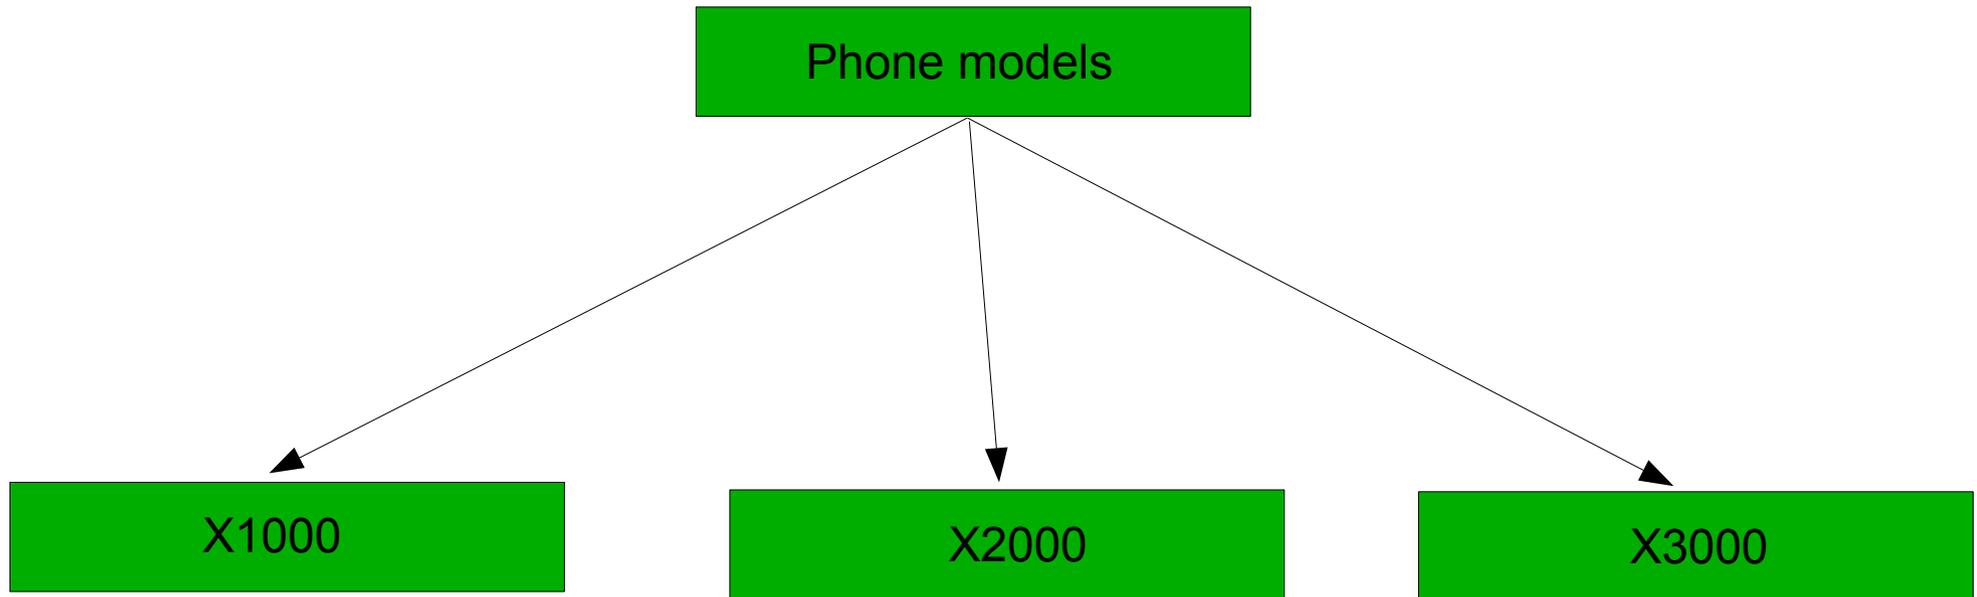

# Content reference range

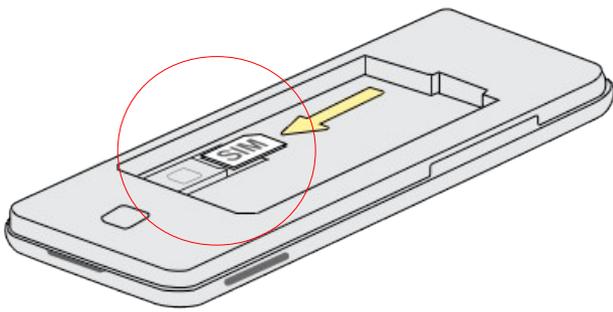

# Content references

- Content references
- Content reference ranges – DITA 1.2

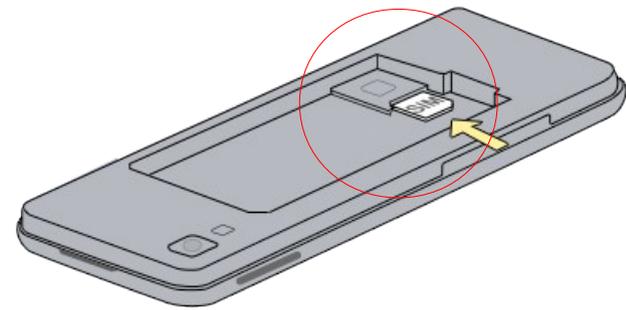

# Profiling case: multiple models

# Profiling case

X1000

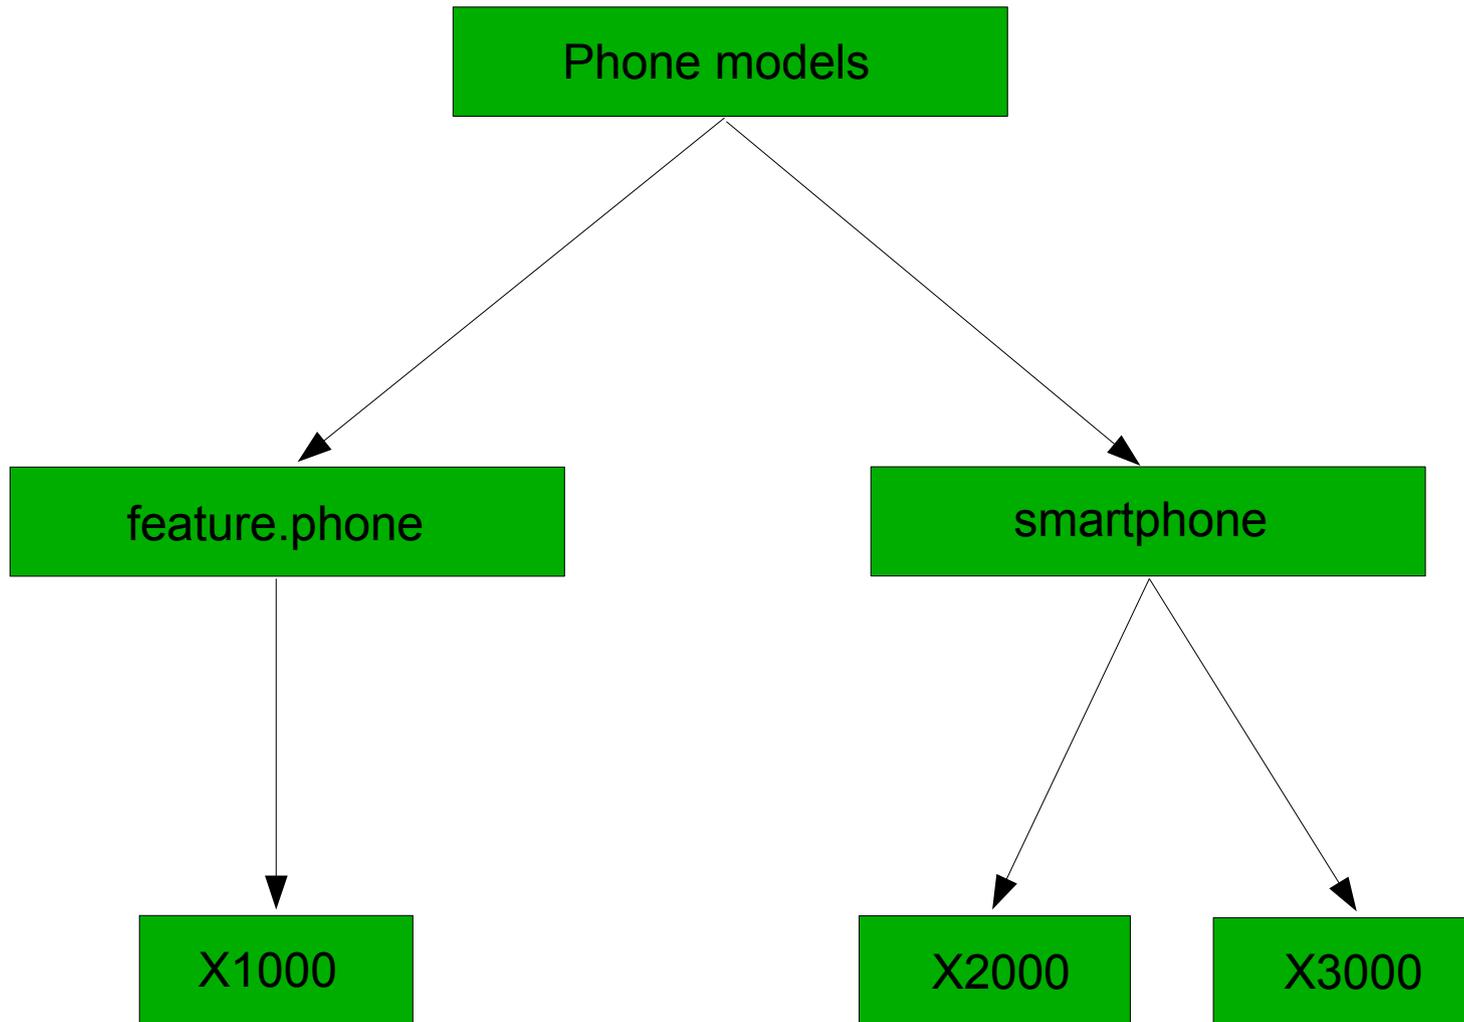

X2000

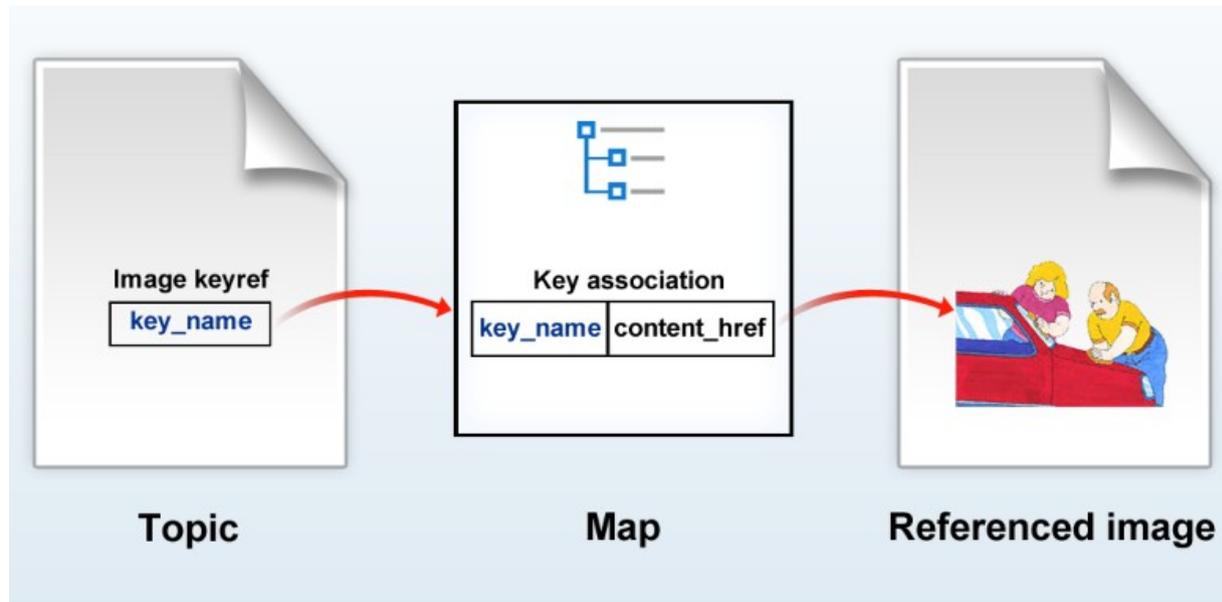

# Profiling/Conditional Content

- Define/Edit profiling attributes
- Profiling Conditions Sets
- Conditional publishing
- Validate and check for completeness

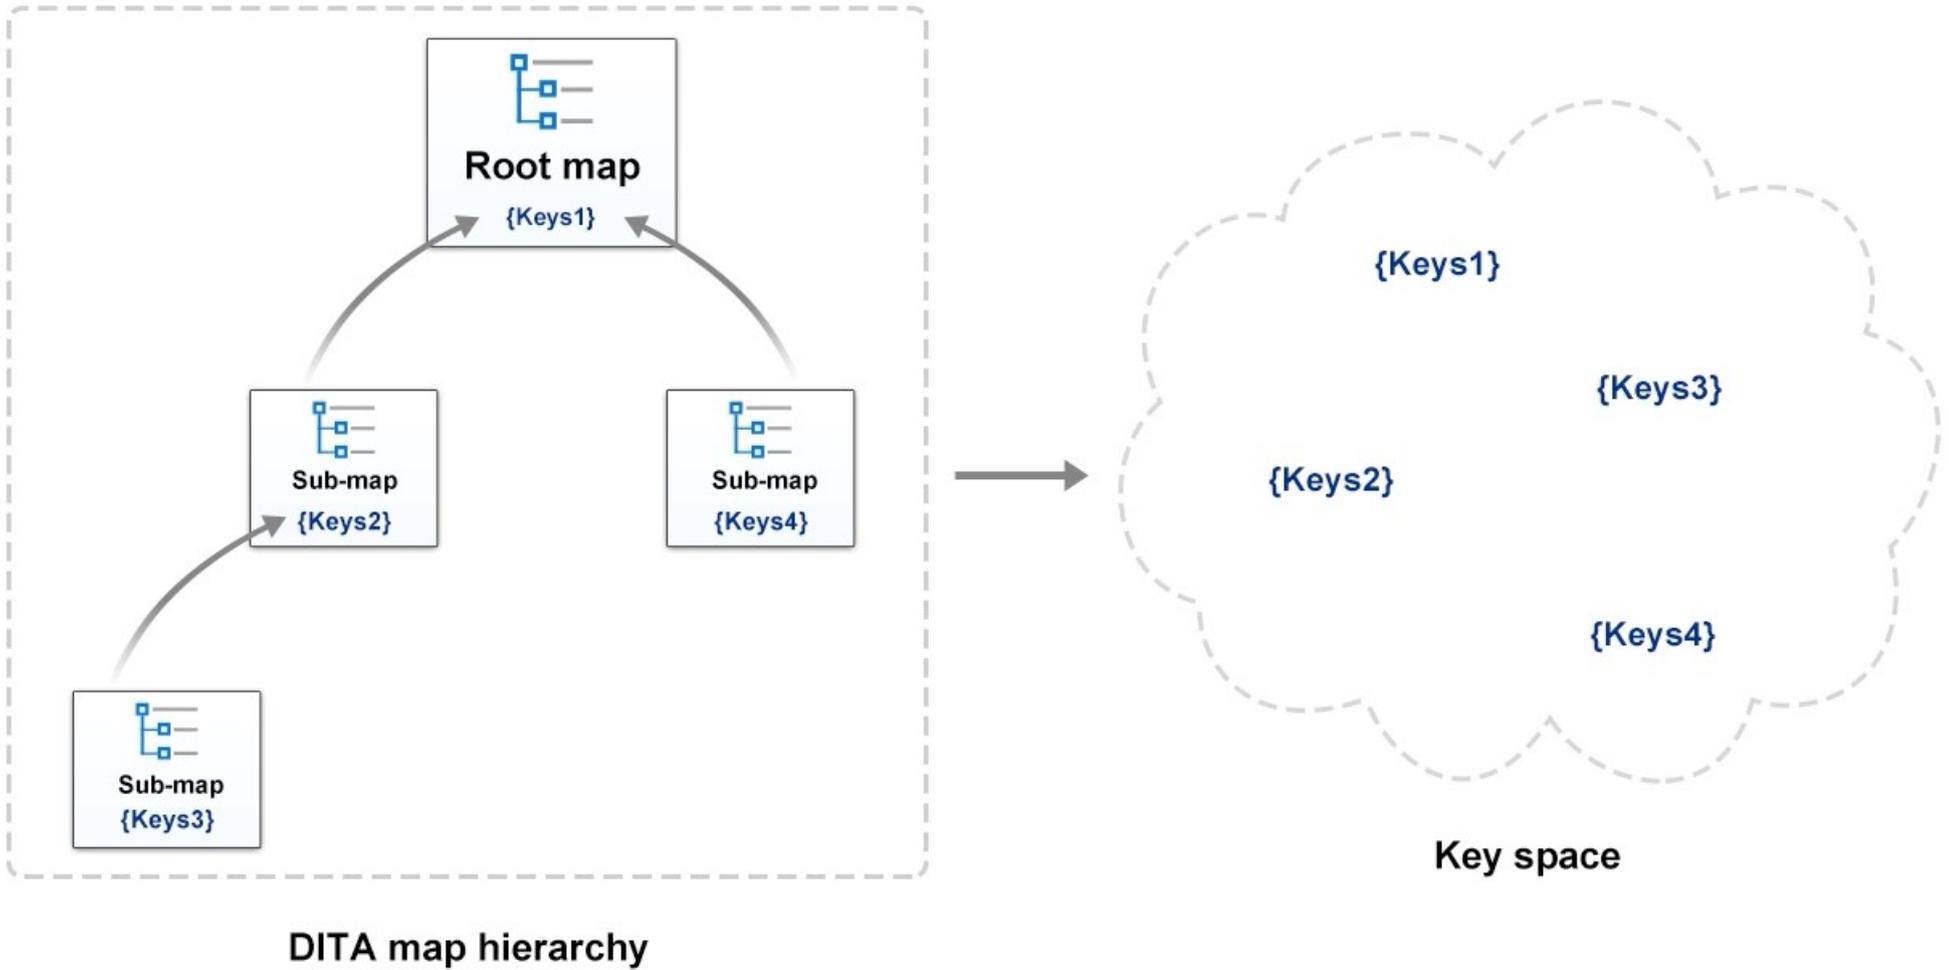

# Mobile phone taxonomy

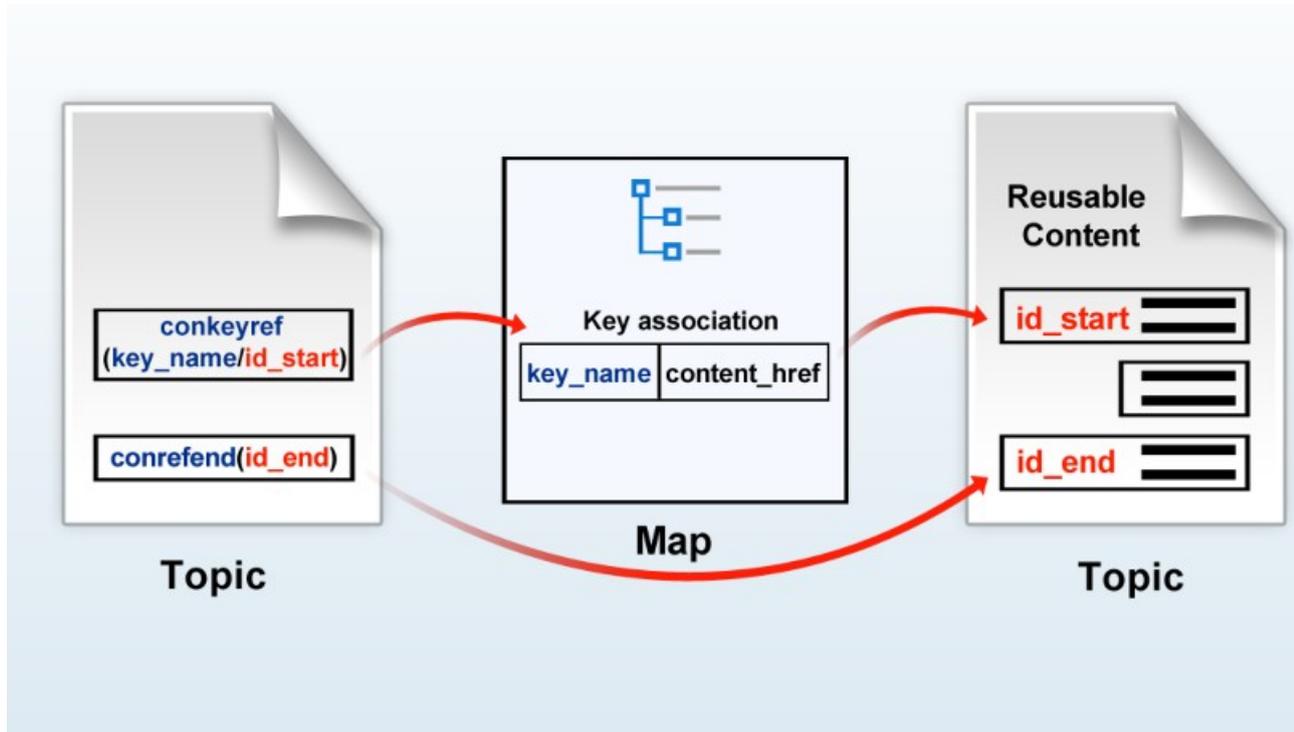

# Key references

# Root Map

# Content key references

# DITA 1.2

- Subject scheme
- Key references and content key references
- Key based conditional processing
- Root map

# Customizing a transformation scenario

- Change parameters
- Custom build file
- Using a different DITA-OT

# Thank you!
